

The multifunctional Corona Web Cleaner

The CC-Plus Corona Cleaner is the best narrow web combination on the market for web cleaning, corona surface treatment and static neutralisation.

The well-known quality and technique from KELVA and VETAPHONE are here integrated in one product, securing higher overall print performance through efficient web cleaning and high surface adhesion.

This unique unit is designed for tomorrow's performance including easy thread-up, reduced space requirement, easy handling, complete machine integration and an all over improved film surface quality.

This combination of web cleaning, corona surface treatment and static neutralisation drastically reduces space requirement and increases functionality.

The CC-Plus unit can be mounted cantilevered and has all connections at the back. There is no doors or parts that needs to be opened for the easy film thread-up.

The Corona Web Cleaner is operated from the CP unit that includes the easy to use operator system with setup features, overview and maintenance information.

CC-Plus the ultimate Corona and Web Cleaner :

- * High efficient contact cleaning
- * Perfect surface corona treatment
- * Treating of conductive substrates
- * No static built-up
- * Easy film thread-up
- * Quick Change Cartridges
- * Easy exchange of adhesive paper
- * Easy integration and maintenance
- * Self diagnostics
- * All connections at the back
- * Profi-Bus/Can-Bus/TCP-IP/MOD-Bus or PLC interface
- * Higher power on less space
- * Improving yield

CC-Plus is available in 3 models:

- * The CC-Plus A300 for film widths up to 300 mm
- * The CC-Plus A450 for film widths up to 450 mm
- * The CC-Plus A600 for film widths up to 600 mm
